Attach a separate sheet of paper with a detailed map of the display site showing the following:

1. **Fall-Out Area:** the area over which aerial shells are fired. The shells burst over this area, and unsafe debris and malfunctioning aerial shells fall into this area. The fall-out area is the location where a typical aerial shell dud will fall to the ground considering wind and the angle of mortar placement.
2. **Discharge Site:** the area immediately surrounding the area where fireworks are ignited for an outdoor display. Include all dimensions of the discharge site.
3. **Display Site:** the immediate area where a fireworks display is conducted and shall include the discharge site, the fallout area, and the required separation distance from the fireworks discharge site to spectator viewing areas. The display site does not include spectator viewing areas or vehicles parking areas.
4. **Distance:** from the outside measurement of the discharge site to spectators, overhead obstructions, buildings, highways, and parking areas. Show distances in feet.

If Applicable, mark: Overhead objects 25 feet or higher, within 100 feet of discharge site and fallout area; existing fences; distance to flammable storage; tent or canvas shelter; location and distances for ground display; ready box; direction of prevailing wind; all buildings; structures; highways; streets or other means of travel within 100 feet of discharge site and fallout area; spectator viewing areas and distances from the discharge site and fallout area; parking areas
